Summary

Aspiring QA Engineer and Software Developer with hands-on experience in manual testing of AI-driven Reinforcement Learning environments at Scaler AI Labs (InterviewBit). Proficient in structured bug documentation, regression testing, and cross-functional communication with development teams. Strong foundation in front-end and back-end technologies including HTML, CSS, JavaScript, Python, and Java. Eager to contribute to quality-first software delivery with a passion for technology and continuous learning.

Experience

Quality Assurance Intern – Scaler AI Labs (InterviewBit Software Services Pvt. Ltd.) *Dec 2025 – May 2026 (Ongoing)*

- Performed manual QA testing of 12+ Reinforcement Learning environments — high-fidelity replicas of real-world platforms including Adobe Sign, Trello, Shopify, SAP, QuickBooks, MS Teams, Google Calendar, and others — at a pace of 1–2 environments per week.
- Identified and documented functional, UI, and workflow defects in a structured Excel-based bug tracking sheet, including reproduction steps, severity classification, and expected vs. actual behavior.
- Conducted regression testing after developer-implemented fixes, verified resolution correctness, and provided final QA sign-off for each environment.
- Collaborated cross-functionally with the development team to communicate complex RL environment behaviors clearly and ensure timely, accurate bug resolution.
- Applied STLC methodologies — exploratory, functional, and regression testing — across diverse domains including e-commerce, project management, accounting, scheduling, and enterprise resource planning.

Projects

SmartDocs – AI-Powered Document Processor *Jun 2025 – Nov 2025*

- Developed an AI-driven web application using React, Express.js, and Ollama for document summarization and quiz generation.
- Integrated Firebase authentication and Tailwind UI for a secure, responsive user experience with local data processing.

YOLOv8 ID Card Detection *Jan 2025 – May 2025*

- Collaborated on a real-time ID card detection system using YOLOv8, trained on a custom dataset annotated with Label Studio.
- Gained hands-on experience with object detection workflows, Python scripting, and model training using the Ultralytics library.

Full-Stack Mine Game (Cloned Betting Game) *Jul 2024 – Sep 2024*

- Assisted with frontend layout using TailwindCSS and supported integration testing and deployment preparation on Vercel.
- Observed implementation of GraphQL, Razorpay API, and JWT-based authentication within a full-stack project context.

Skills

Technical: HTML, CSS, JavaScript, Python, Java, SQL

QA Skills: Manual Testing, Bug Reporting, Regression Testing, Exploratory Testing, STLC, Excel-based Bug Tracking

Tools: VS Code, Android Studio, Label Studio, Microsoft Excel

Libraries/Frameworks: React, Express.js, TailwindCSS, Ultralytics (YOLOv8), Firebase

Education

Bachelor of Technology in Computer Science and Engineering

Jawaharlal Nehru Engineering College, Chh. Sambhajinagar (MGM University) *Aug 2022 – Jun 2026*

CGPA: 7.68 / 10.00
